Profile Summary

Data Scientist with a Ph.D. in Computer Science and a strong foundation in deep learning. Experienced in end-to-end model development with PyTorch to build and deploy models. Results-driven professional with robust Python development skills, recognized for a collaborative style, problem-solving mindset, and commitment to delivering innovative, high-performance, production-ready artificial intelligence agents and automated systems across modalities.

Experience

Data Scientist

São Paulo, SP, Brazil

Human Brains

2025–Present

- Responsible for the technical development of context-aware agentic AI systems using LangGraph, prompt engineering, RAG, guardrail middleware, and memory architectures, with production-grade observability
- Built and maintained Python libraries for multimodal data ingestion and standardization automation, doubling team delivery speed and reducing bug-related patches
- Delivered 90% faster CI/CD deployments and 80% lower pipeline spend by fixing improper OCR usage and optimizing processing workflows
- Established governance for enterprise data, designing policies for quality, lineage, and role-based access control across Snowflake, PostgreSQL, and AWS to protect data integrity and security
- Introduced team to best practices in Python development

Associate Researcher

São José dos Campos

Center for Innovation on New Energies

2019–2025

- Achieved a 35% performance improvement in property prediction by designing and training a novel contrastive neural network for molecular data
- Led an international collaboration that developed a novel multi-task learning model, achieving up to a 50% reduction in error under extreme data constraints
- Pioneered the application of ML to materials discovery at CINE, authoring the institute's inaugural publication on the topic
- Authored and contributed to 10 peer-reviewed publications, presented findings at conferences, and was invited to deliver minicourses and hands-on tutorials
- Provided training and support to new team members, fostering a collaborative environment and enhancing team productivity

Education

Federal University of São Paulo

São José dos Campos, SP, Brazil

Ph.D. in Computer Science

2020–2025

- **Specialization:** Intelligent Systems
- **Relevant Coursework:** Neural Networks, Complex Networks, Machine Learning and Pattern Recognition, Computational Intelligence
- **Instructor:** Neural Network

Visiting Researcher

Corvallis, Oregon, USA

Oregon State University

2023–2024

National Institute for Space Research

São José dos Campos, SP, Brazil

M.Sc. in Applied Computing

2018–2020

- **Specialization:** Artificial Intelligence for Space Applications
- **Relevant Coursework:** Neurocomputing, Digital Image Processing, Introduction to Data Science, Computational Mathematics I

São Paulo State College of Technology

Guaratinguetá, SP, Brazil

Associate Degree in Systems Analysis and Development

2015–2018

- **Instructor:** Calculus I

Technical Skills

Programming Languages (high proficiency): Python

Programming Languages (some proficiency): SQL, JavaScript, C++, C#, C, Scala, Julia, Lua, Cypher

AI: Scikit-Learn, PyTorch (high proficiency), Keras, TensorFlow, LangChain, LangGraph

Data Science: Pandas, NumPy, Matplotlib, Seaborn, SciPy

Web Development: HTML, CSS, JavaScript, Flask

Databases: PostgreSQL, Snowflake, Neo4j, MySQL, MongoDB

Cloud / DevOps: AWS (S3, Lambda, EC2), Docker

Version Control: Git, GitHub

Languages

English (Highly proficient), Portuguese (Native), Spanish (Novice)
